

Important Information for New Jersey Residential Customers

The rates you pay for electricity have been adjusted as of October 1, 2005, according to a schedule approved by the Board of Public Utilities (BPU). On average, these rate changes will result in an annual total bill increase of approximately 5.2%, or \$5.00 per month, for a typical residential electric customer using 750 kWh per month. However, the BGS rate is season sensitive: you will pay more for electricity during the four months of summer (June through September) and less during the eight months considered winter (October through May). This is because during summer months there is more demand for electricity, therefore it costs more to purchase it. This rate sheet is enclosed for your convenience and easy reference.

Bills Under the New Rates:

Monthly kWh use	Summer	Winter
100	\$16.83	\$15.14
300	\$45.53	\$40.47
500	\$74.22	\$65.80
750	\$110.10	\$96.10
1500	\$227.86	\$186.99
3000	\$463.33	\$368.79

Your Bills Are Prorated

Electric billings are based on rates designed for a 30 day billing period. Billings for other than 30 days are calculated to reflect the actual number of days in the billing period as follows:

Service Charge $\$2.48 \div 30 = \0.082700 per day

Distribution Charge First Block (Summer): $750 \text{ kWh} \div 30 = 25 \text{ kWh}$ per day

Distribution Charge First Block (Winter): $500 \text{ kWh} \div 30 = 16.667 \text{ kWh}$ per day
