Late Payment Charge for Commercial & Industrial Customers

Overdue bills for commercial and industrial customers will be subject to a late payment charge of .877% (10.52% Annual Percentage Rate). The charge will be applied to all bills not paid to the company within 45 days (60 days for governmental bodies) following the due date specified on the bill. Demand-The amount of electric power required by a customer during a 15 minute period. Demand is measured in kilowatts (kW). 1000 watts = 1 kW. Except for Annual General Service (AGS), and Transmission General Service (TGS) customers, the highest demand measured is used for billing purposes. AGS and TGS customers are billed the greater of measured demand or a calculated minimum demand, but in any event, not less than 25 kW. Proration-Electric billings are based on rates designed on a 30-day billing period. Billings for other than 30 days are calculated to reflect the actual number of days in the billing period.

*Retail Margin is applicable to all BGS CIEP Customers and to Commercial and Industrial BGS-FP Customers with Peak Load Shares equal to or greater than 750 kW.

** Winter Excess Demand - During the months October through May inclusive, for demand in excess of the metered demand recorded during months June through September inclusive.

***Customers taking service at a voltage level at or above 23kV or who have a Peak Load Share at or above 1,000 kW or who have otherwise volunteered before the second working days of January will receive BGS service under the BGS-CIEP Option. Customers who are eligible to be served under BGS-CIEP will be subject to the CIEP Standby charge.
