

BUILDING A SMARTER, STRONGER AND CLEANER ENERGY GRID FOR CAMDEN COUNTY

An Exelon Company

We are modernizing and strengthening the local energy grid to make it more resilient against the growing threats of extreme weather, reduce the frequency and duration of power outages and improve energy service for local customers. Here are several examples in your community.

CRITICAL RELIABILITY PROJECTS

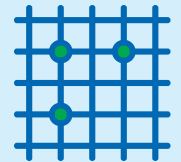

STRONGER

Camden County customers continue to experience improvements in the reliability of their energy service because of our ongoing efforts to modernize the local energy grid.

- Reduced power outages by **23 percent** in Camden County over the last few years
- Upgraded **12 miles** of power lines in Camden County over the past few years
- Trimmed trees along **765 miles** of distribution lines to help reduce outages over the last several years

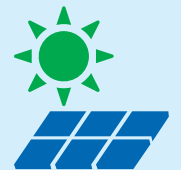

SMARTER

Innovative technologies improve system reliability and service for our customers in Camden County. This specialized equipment can automatically restore service more quickly or isolate damage.

- Installed more than **200 automated devices** over the past couple years

CLEANER

We are bringing the benefits of renewable energy to our Camden County customers.

- Connected **585 new solar customers** to the local energy grid in 2020
- Nearly **5,350 total solar customers** in Camden County
