

BUILDING A SMARTER, STRONGER AND CLEANER ENERGY GRID FOR SOUTHERN OCEAN COUNTY

An Exelon Company

We are modernizing and strengthening the local energy grid to make it more resilient against the growing threats of extreme weather, reduce the frequency and duration of power outages and improve energy service for local customers. Here are several of these efforts in your community.

CRITICAL RELIABILITY PROJECTS

Fortifying Substations

Modernizing local substations to handle the region's evolving energy needs and more extreme weather, creating a more reliable and resilient connection between the regional transmission system and the local energy grid.

Strengthening Power Lines

Upgrading power lines using stronger, state-of-the-art utility poles to reduce the impacts of severe storms and to improve reliability for customers.

STRONGER

Southern Ocean County customers continue to experience improvements in the reliability of their energy service because of our ongoing efforts to modernize the local energy grid.

- Reduced power outages by **64 percent** in Southern Ocean County over the last five years
- Upgraded **18 miles** of power lines in Southern Ocean County over the past couple years
- Trimmed trees along **400 miles** of distribution lines to help reduce outages over the last several years

SMARTER

Innovative technologies improve system reliability and service for our customers in Southern Ocean County. This specialized equipment can automatically restore service more quickly or isolate damage.

- Installed and modernized more than **100 automated devices** over the past few years

CLEANER

We are bringing the benefits of renewable energy to our Southern Ocean County customers.

- More than **2,230 solar customers** in Southern Ocean County
