

Traditional Lighting

Cobra

Familiar Design, Staying Power

The first and best choice for many municipal and residential applications continues to be the Cobra. Its height and horizontal reach target light precisely where needed. Selection from a wide range of available wattages ensures the ability to meet the specific lighting requirements of any number of projects.

Applications Streets, neighborhoods, highways, parking lots, open areas, commercial driveways

Lamp Sources High pressure sodium (HPS); metal halide

Wattages HPS: 50, 70, 100, 150, 250, 400;
metal halide: 400

Pole Styles Round wood, mounting height 25, 30 or 35 feet (embedded); fiberglass 25-foot mounting height (30-foot embedded)

Lighting Distribution Asymmetrical IES Types II (150 watts or lower) and III (250 watts or higher)
