

THE NEW SMART ENERGY NETWORK IS COMING SOON!

An Exelon Company

Smart Meters Will Provide Enhanced Reliability and New Tools to Save Money and Energy

As part of our new Smart Energy Network, **all Atlantic City Electric customers will receive new smart meters.** The upgrades will begin in September 2022, and we expect to have all smart meters installed by the fall of 2024.

Once your new smart meter is activated and our Smart Energy Network is complete, you'll be able to count on **faster response times, more control over your energy usage, and, best of all, more reliable electric service.**

You will receive several notices prior to your meter upgrade to let you know how the process will work. **No action is needed on your part,** and our installers will leave a doorhanger to let you know that the work is complete.

If you decide you do not want to upgrade to a smart meter, you will need to contact Atlantic City Electric at 866-524-2982. You will be charged a recurring monthly fee of \$15 for the cost of reading and maintaining your existing meter.
