## Additional Merger Benefits

Our merger with Exelon Corporation will deliver direct benefits to our customers in New Jersey. In addition to funding your customer rate credit, a Customer Investment Fund will be used for energy efficiency programs. The merger also sets even higher requirements for us to increase the reliability of electric service, which means fewer and shorter power outages. Plus, over the next 10 years, millions of dollars in charitable contributions will continue to go to local nonprofits that serve our customers.
