

ENHANCING RELIABILITY ACROSS SOUTH JERSEY

We are undertaking a broad strategic effort to strengthen and modernize the energy grid serving South Jersey. This effort includes dozens of targeted projects to harden our critical energy infrastructure and build a more resilient grid.

- 1 PowerAhead Grid Resiliency Program** – Modernizing the local energy grid by addressing vulnerable areas that have experienced extended outages during recent severe storms.
- 2 Atlantic City/Brigantine Community Reliability Project** – Replacing an existing substation and rebuilding two critical transmission lines to strengthen the local energy infrastructure and improve reliability for local customers.
- 3 Atlantic to Ocean Counties Reliability Project** – Rebuilding 15 miles of critical transmission line running through Port Republic, Bass River Township and Little Egg Harbor Township to improve reliability for thousands of customers.
- 4 Cape May Substation Reliability Project** – Modernizing an existing substation that serves more than 7,100 customers and is critical to customer reliability in Cape May, West Cape May and Cape May Point.
- 5 Greater Gloucester and Camden Counties Reliability Project** – Upgrading 10 miles of transmission line between Monroe Township and Pine Hill to improve reliability for 13,600 customers in Gloucester and Camden counties.
- 6 Middle Township to the Wildwoods Reliability Project** – Rebuilding 4 miles of critical transmission line between Middle Township and the Wildwoods to strengthen the local energy grid against more extreme weather.
- 7 Salem County Reliability Project** – Rebuilding 3.5 miles of transmission line, that primarily runs along Route 130 between Penns Grove and Pennsville, to enhance the quality of energy service for thousands of local customers.
- 8 Washington/Gloucester Reliability Project** – Modernizing an existing substation to improve energy service reliability for more than 10,000 existing customers in Washington Township and about 1,300 customers in Gloucester Township.
- 9 Upper Township to Dennis Township Reliability Project** – Modernizing 10.2 miles of transmission line along an existing right-of-way between Beesley’s Point in Upper Township and Ocean View in Dennis Township to benefit more than 30,000 Cape May County customers.
